

Amendments to the Specification

Please **replace** the paragraph beginning at page 11, line 7 with the following **corrected** paragraph:

-- a text field including a descriptive of the reason for the reservation (for example "~~Registering of the Z channel~~ Recording of channel Z").--

Please **replace** the paragraph beginning at page 16, line 26 with the following **corrected** paragraph:

-- An application can also implement the preemption mechanism so as to appropriate the status of primary application. In this case, the resource manager verifies that this application does indeed have priority to make this request, relative to the priority of the current primary application. If it authorizes the preemption, the resource manager sends a transfer command which the primary application is obliged to accept. A given time is then accorded to the primary application to free the resource. If this time is not complied with, the resource manager effects the ~~transfer of duty~~ forceful transfer of the resource.--
